Merchant Steps for Onboarding

- 1** The merchant Hyfin account will be created by Clearent’s Onboarding Team and a user invite email is sent. Please follow the link and complete your setup.

Upon logging in, you may be prompted to set up your QuickBooks Online integration (if applicable). Note, you may skip this step and await further instruction via your Hyfin Training.

- 2 Once you receive the Hyfin Welcome Email, informing that the account is live and ready to accept payments, you'll have to ability to schedule training if you're integrating QuickBooks Online.

Not Utilizing QuickBooks Online Email:

Hi ____

Your **Hyfin** service is live and ready for you to start accepting payments. An email has been sent allowing you to set up your password and access your account.

How to reach us.
'Contact Us' page inside the Hyfin Platform

Again, welcome to **Hyfin**!

Best regards,

Please Note: A standalone sale of Hyfin will not include training with Hyfin and you will only receive a training scheduling link for accounts with QuickBooks Online integration.

QuickBooks Online Integration Email:

Hi ____

Your **Hyfin** service is live and ready to accept payments. An email has been sent allowing you to set up your password and access your account. The next step in the process is scheduling your training. The training will last approximately 45 minutes and require you to be at your computer, where you can access your account. Please schedule your training here: [Schedule Now](#).

Hyfin's dedicated Support Team is here to provide you with the best experience possible. Whether you have questions or want to explore features, we are happy to help.

How to reach us.
Support Hours: Monday-Friday 8:00 am-5:00 pm CST
Call us at 913-370-7577
Email us at support@hyfin.app
'Contact Us' page inside the Hyfin Platform

Thank you,

- Hyfin's Onboarding Team will forward the training invite to the Clearent Sales Rep listed to be included in training.

3 Configuring Your Hyfin Merchant Account

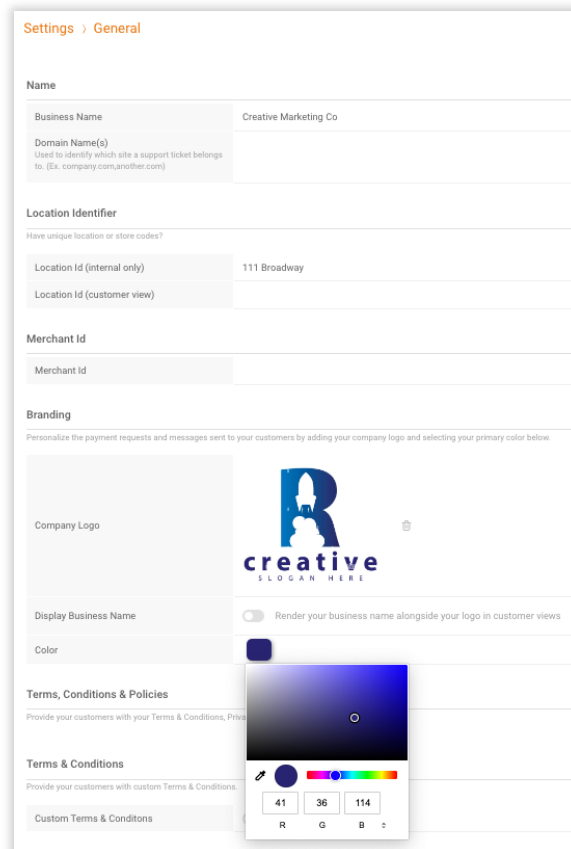

After you receive your account email invite, have completed setup, and log into your Hyfin Merchant Account, you're ready to use helpful features including adding your logo and primary color, setting payment notifications and more. Below are instructions for setting up commonly used features on the platform to help ensure you are set up for success from the start!

To use these features, log into your Hyfin production account:

4 Adding a Logo & Primary Color

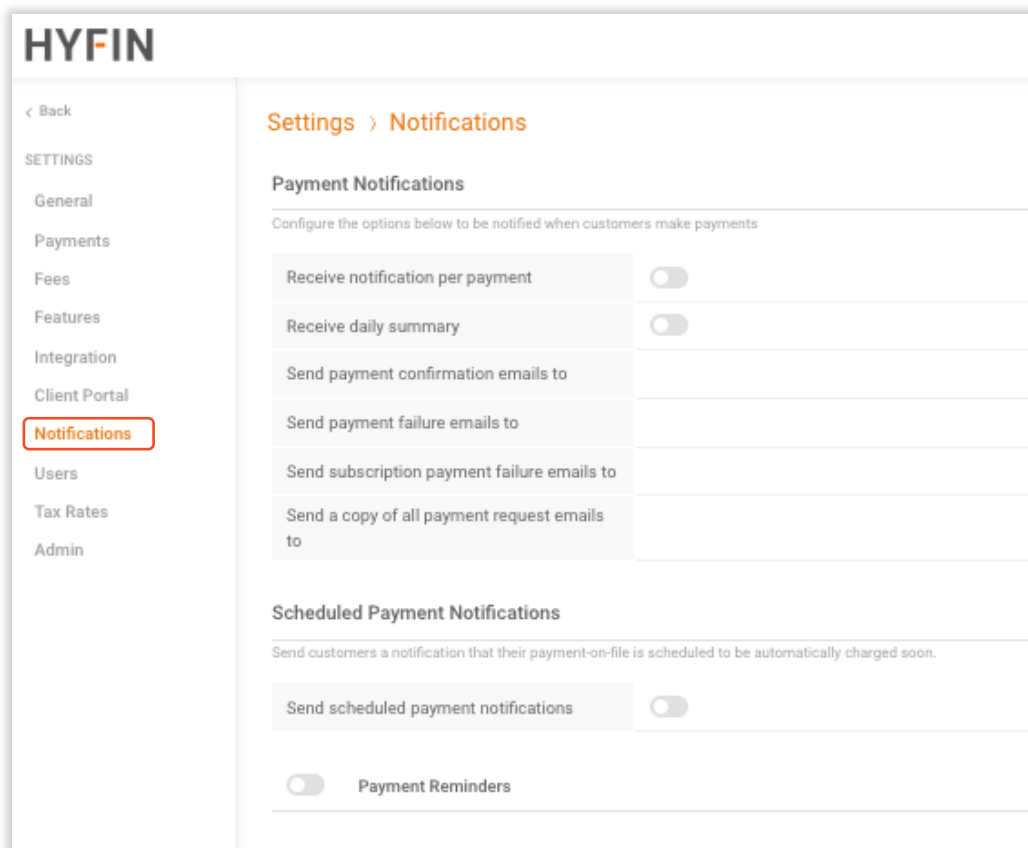

- To add your custom logo and primary color, click on “Settings” and then select “General”.
- Upload the logo and use the color dropper to pull in a color from the logo or enter RGB values. Please note, the logo cannot be white, or it will not show up.

The screenshot shows the 'Settings > General' page in the Hyfin merchant account. The 'Branding' section is active, allowing the user to personalize payment requests and messages. It includes a 'Company Logo' field with a preview of a logo for 'creative' and a 'Color' field with a color picker. The color picker is currently set to a blue color with RGB values of 41, 36, and 114. Other sections visible include 'Name', 'Location Identifier', and 'Merchant Id'.

5 Set Up Payment Notifications & Reminders

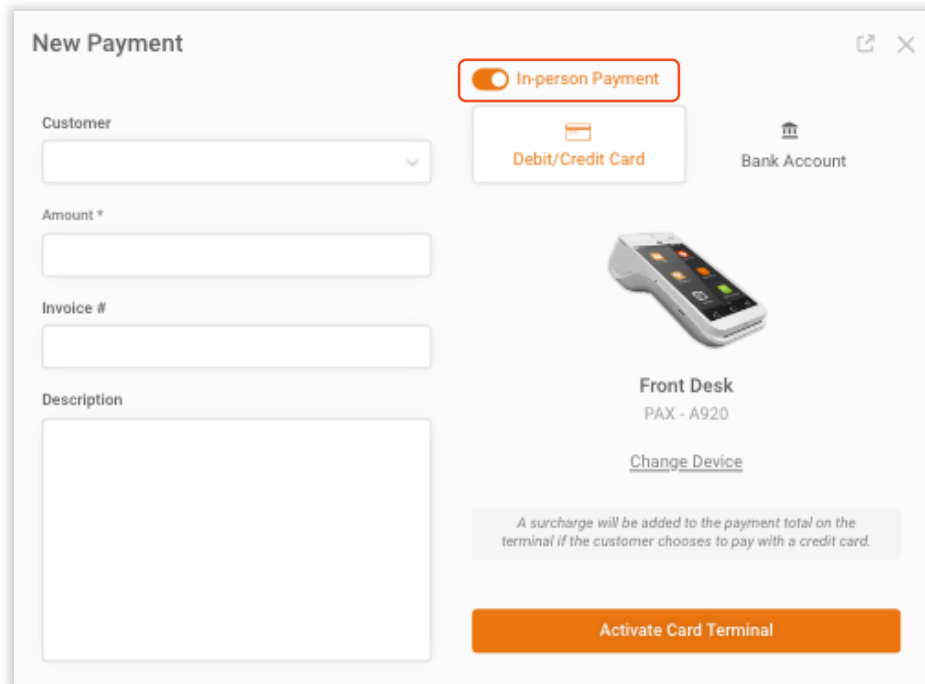

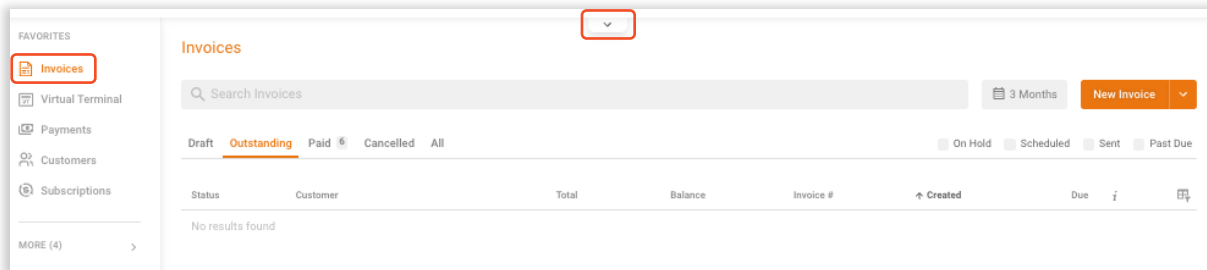

- From the “Settings” menu, select “Notifications”.
 - Enable payment notifications to merchant via per payment or daily summary. These notifications can go to one or multiple emails.
 - Enable scheduled payment notifications for merchants with payment information on file reminding them that their payment will be processed soon.
 - Enable payment reminders on outstanding invoices.

The screenshot shows the HYFIN Settings interface for Notifications. On the left is a sidebar menu with options: < Back, SETTINGS, General, Payments, Fees, Features, Integration, Client Portal, Notifications (highlighted with a red box), Users, Tax Rates, and Admin. The main content area is titled 'Settings > Notifications' and is divided into two sections: 'Payment Notifications' and 'Scheduled Payment Notifications'. The 'Payment Notifications' section includes a sub-header 'Payment Notifications' and a description 'Configure the options below to be notified when customers make payments'. It contains six rows of settings: 'Receive notification per payment' (toggle off), 'Receive daily summary' (toggle off), 'Send payment confirmation emails to' (text input), 'Send payment failure emails to' (text input), 'Send subscription payment failure emails to' (text input), and 'Send a copy of all payment request emails to' (text input). The 'Scheduled Payment Notifications' section includes a sub-header 'Scheduled Payment Notifications' and a description 'Send customers a notification that their payment-on-file is scheduled to be automatically charged soon.'. It contains one row: 'Send scheduled payment notifications' (toggle off). At the bottom, there is a 'Payment Reminders' section with a toggle switch that is currently off.

6 How to Run a Test Transaction on a Device

- Access the Virtual Terminal on the left-hand navigation pane or through the drop-down arrow at the top middle of the screen.
- Toggle on “In-person Payment” and the device will be visible.

- Key in customer, amount, and select "Activate Card Terminal".
- The device will “wake up” to make payment.
- Once the payment is made, a successful payment response will appear on the screen within Hyfin.

- To Void the Test Transaction: Select the payment under the “Payments” tab, click the ellipsis (three dots in the upper right corner) and “Process Refund”. If refunded before the batch out time the same day, it will void the transaction.

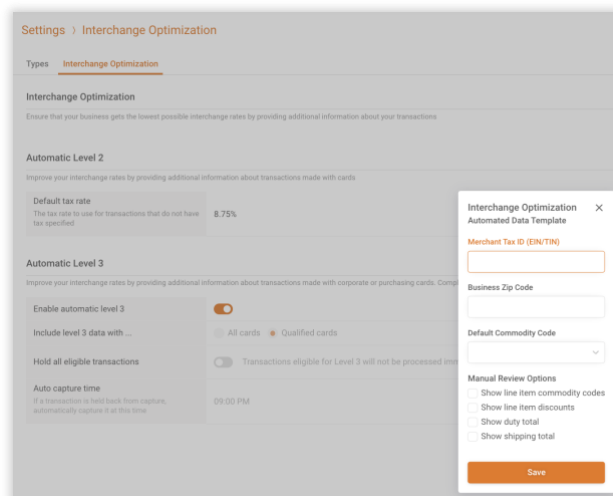

7 How to Set Up Interchange Optimization (Automated L2/L3)

- Using L2 or L3 interchange optimization? If so, use the following steps to get set up. From the “Settings” menu, select “Payments” and then “Interchange Optimization”.
- L2: Set tax rate.
- L3: Set tax rate and complete the information shown below. Once this is set, we will pass along the following information along with specific transaction details to qualify for interchange optimization.

The system will default to only passing the information on for qualified cards; however, there is an option to send the data through on all cards which is not the norm.

There is also an option to hold all eligible transactions for review. If this is enabled, the merchant will have until the batch out time set to review and make changes to the data which is also not the norm.

8 Get Support

Please contact the Clearent Customer Support Team with questions or support needs. This team will escalate to Hyfin as needed. Escalated support inquiries can be directed to Support@hyfin.app. Please include the merchant DBA and contact information if you are sending it on behalf of your customer.
